

# DELIVERING ADVANCED DENTAL TECHNOLOGIES AND SERVICES AROUND THE WORLD

ORLD LAB has been in the business of servicing dental practices for many years from multiple locations throughout the world, including seven of which are major manufacturing facilities. These include WORLD LAB USA based in Irvine, California; WORLD LAB Japan located in Tokyo, Osaka, Sendai, and Niigata; and WORLD LAB China in Shanghai and Hong Kong. Our ability to provide unparalleled lab services through these worldwide establishments has enabled us to develop many valuable, long-term partnerships with both dental laboratories and individual dentists on a global scale.

When entrusting WORLD LAB with your cases, there are basically three options available as to where those restorations can be fabricated: USA, Japan, or China. When selecting one of our overseas facilities, you can feel confident that our friendly and knowledgeable WORLD LAB USA staff will process, monitor, and quality control each case through to completion until returned from Japan or China for delivery back to your office. The consistent, high-quality esthetic restorations produced in Japan and China are fabricated by trained WORLD LAB technicians who are highly skilled craftsmen with a flair for creativity and artistic mastery.

We understand that your time is very valuable and assure you that your chair time will be significantly reduced, thereby dramatically increasing the revenue in your practice. Send us your next case and experience a whole new level of dental laboratory service that is guaranteed to satisfy all of your needs.

## U.S.A.

Irvine, CA

**Ultimate level of advanced lab work.** We offer custom shading in our lab for more challenging cases. You can also rely on us for rush cases.
